Nikon announces another price increase
Nikon UK will be introducing a second price increase on the 1st March 2009 which will affect Nikon's Imaging and Optics products. In a press release Nikon said: "The price increase is due to the relative weakness of Sterling and the continued strength of the Yen. A range of product groups will be affected however the COOLPIX series and selected digital SLRs will not see an increase." The new prices will be announced on March 1st.
